**THE GREATER HAMILTON SAFETY COUNCIL AND THE INDUSTRIAL DIVISION** are aware many of our Members are now participating in BWC's Group Rating or Group Retrospective Rating Programs. As of July 1, 2009 BWC has mandated Employers of these specific groups must attend a two-hour workplace safety training session annually if they have had a claim within the last two years of their current Policy period.

In following the guidelines the BWC has set for this mandate, we will be offering a two-hour Seminar on March 23<sup>rd</sup> so companies may comply with this requirement before the end of their Policy period. Fortunately, we are also able to offer this Seminar to Council Members only who are qualifying in the BWC FY10 Rebate Program as an external training credit. To receive this credit those Members must attend the full two-hour session

A Certificate of Completion will be given to all Attendees at the end of the Seminar. Those attending for "Group" will be responsible for submitting the Certificate to their Group Rating Sponsor. Council will forward Certificates to BWC for FY10 Members. This Seminar is also opened to our Self-Insured Members who may find the topics of value to their safety program.

The Seminar will be held at the Butler County Engineer's Office (See Map/Directions), and will be limited to the first sixty (60) who register. Please submit payment with your registration form
